

As an ordinary citizen, and a belief in the adage information is knowledge. I ask you to stop letting the corporations influence your ideas and actions. Please listen to the average man. But, also remember you are the custodian of the airwaves not the owner and operator. When you release the large business from the restrains of small interest you are doing your children's children the disservice. Because them will lack the access to early honest commentary of history and future world events  
Thank you for your time
